

Reference Image from which we will extract texture and overwrite all Japanese Text

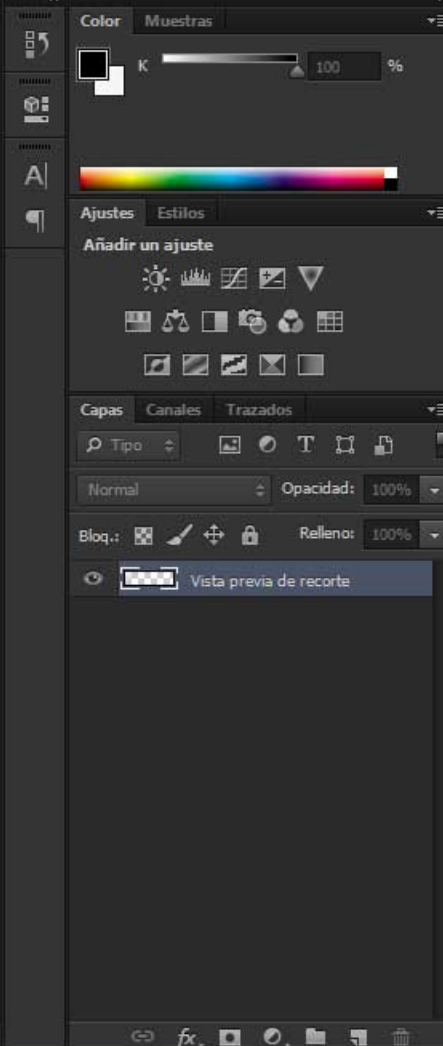

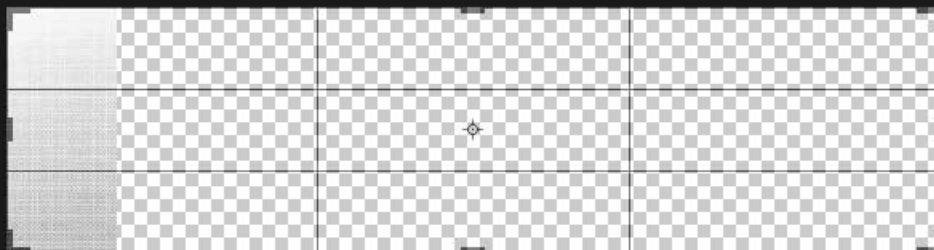

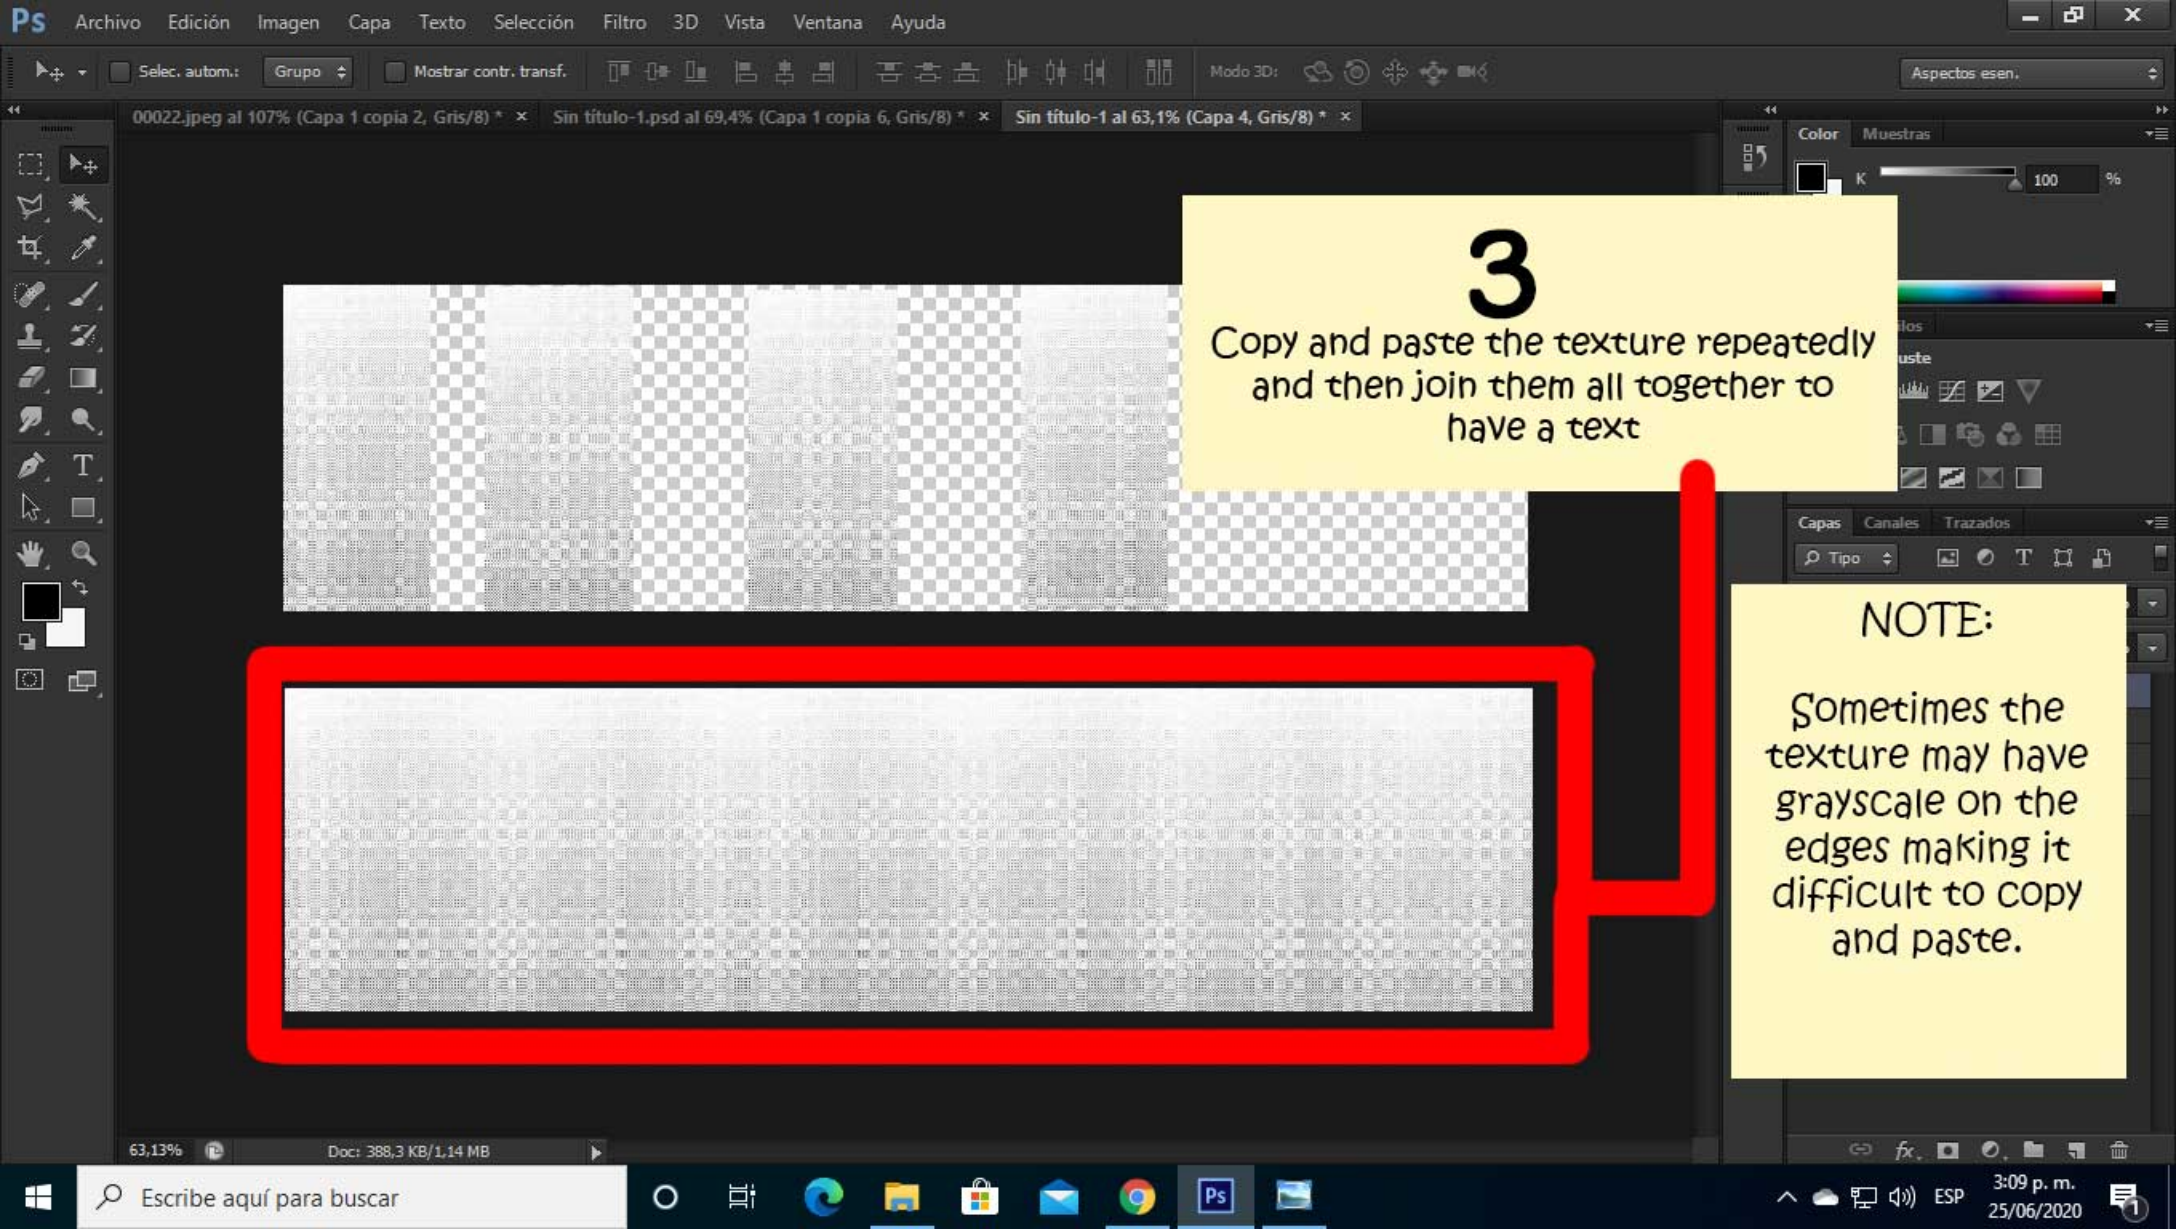

1

Find the same background texture or a similar one in another manga image.

2
On a new canvas paste the texture you just copied and resize the canvas to a fairly

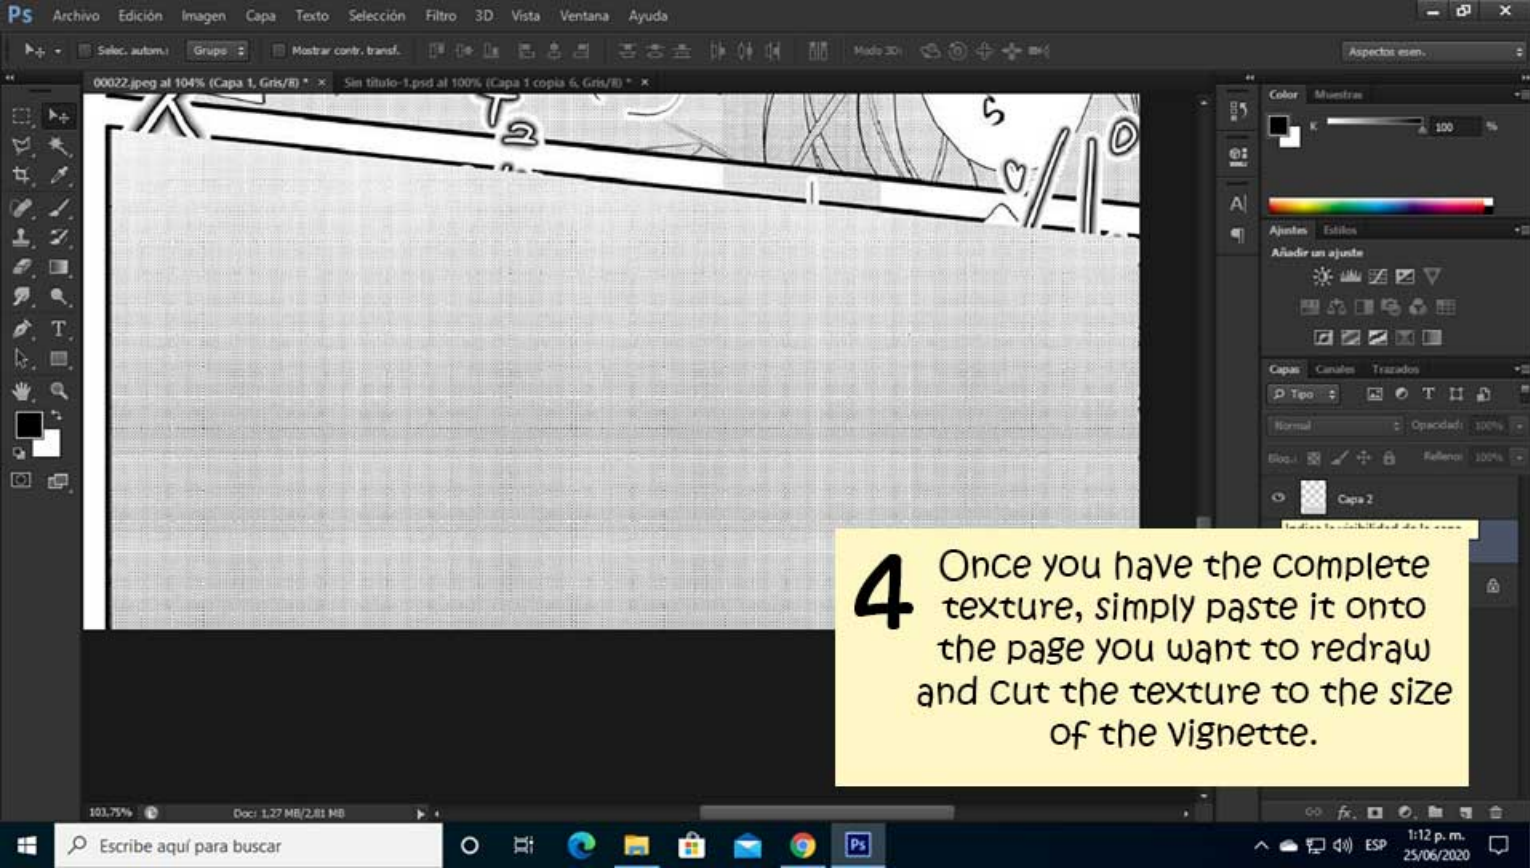

3

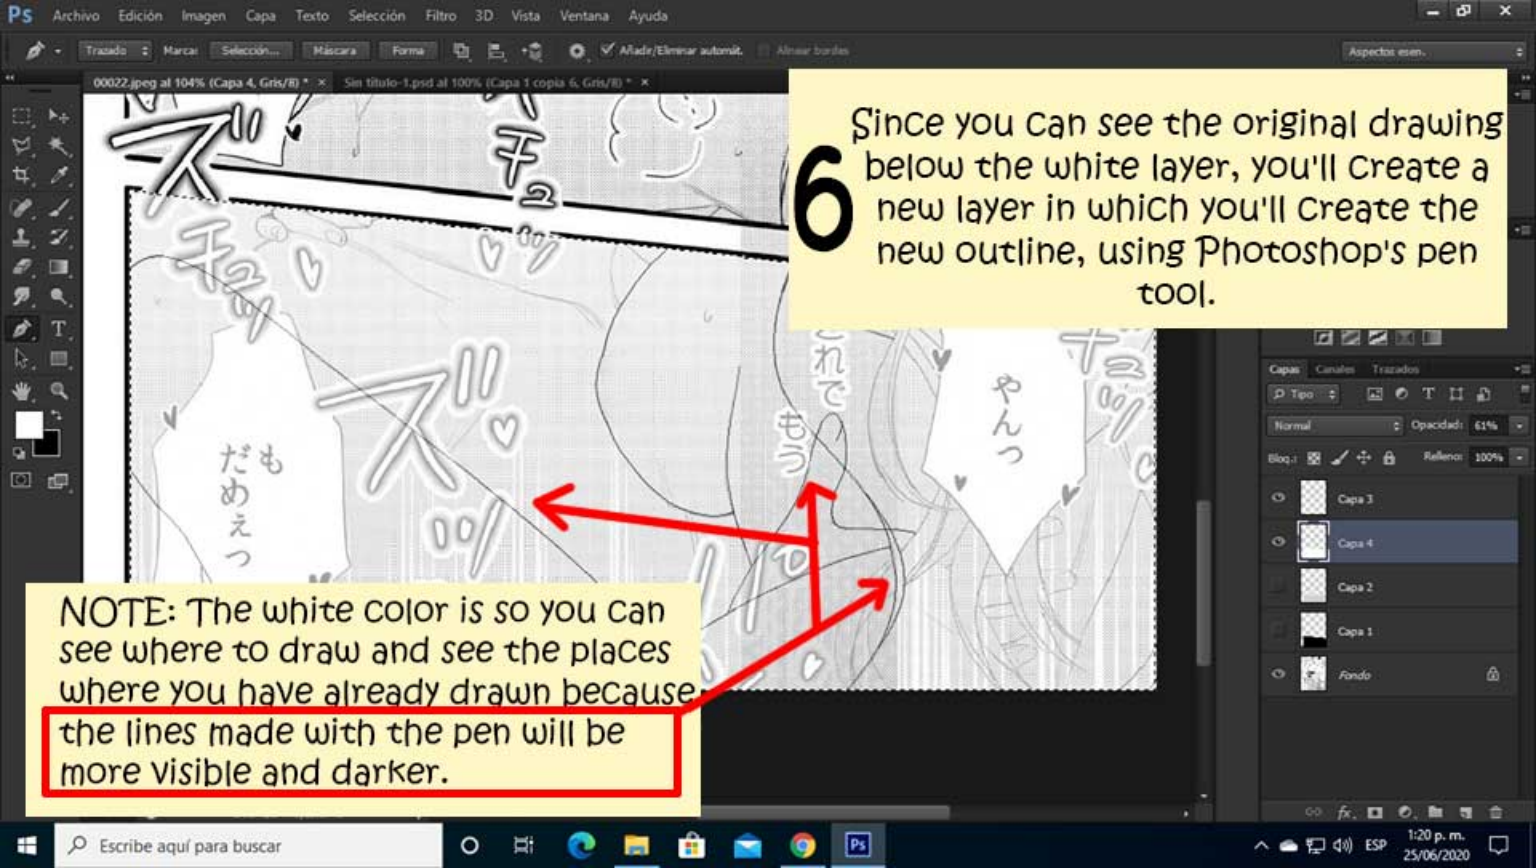

Copy and paste the texture repeatedly
and then join them all together to
have a text

NOTE:

Sometimes the
texture may have
grayscale on the
edges making it
difficult to copy
and paste.

4 Once you have the complete texture, simply paste it onto the page you want to redraw and cut the texture to the size of the vignette.

6

Since you can see the original drawing below the white layer, you'll create a new layer in which you'll create the new outline, using Photoshop's pen tool.

NOTE: The white color is so you can see where to draw and see the places where you have already drawn because the lines made with the pen will be more visible and darker.

7

Once you have your entire stroke done, just right click and click on the stroke outline option to be able to mask the shape you made previously.
